Query the data – simple or complex:

WITHIN ONE MAP LAYER

To Identify features of interest within a specific map layer, view them in tabular form, or export the results as a csv, shapefile for further analyses, or save them as a kml file for viewing in Google Earth for higher image resolution and access to historical imagery to identify

Within Layer Query Tool

Query: Herd Management Areas (HMA)

Location: ALL

hma_name: Beatsy Butte

hma_id: [dropdown]

admin_st: [dropdown]

Reset | Get Results

BETWEEN TWO LAYERS

To answer more complex questions using more than one map layer:

- (1) Select layers of interest
- (2) Select the attributes of interest within each layer by clicking on the "funnel" icon. More than one attribute can be selected from each dropdown tab to further refine your searches

Multi-Layer Query Tool

Find: hmas

That: are within

Selected: Level III Ecoregions

Select Level III Ecoregions: ALL
