

## Summary of U.S. Bureau of Land Management Land Health Standards Status Associated with Wild Horses by State (1997-2023)

<b>Wild Horses as a Cause for Land Health Standard Failure by State</b>		
<i>BLM identifies wild horses as a cause of failure to achieve land health standards in 77 allotments containing roughly 7.4 million acres of public lands. The majority of lands which fail standards and identify wild horses and burros as a cause are in Nevada.</i>		
<b>State</b>	<b>Acres identified as failing due to “horses” or “horses and livestock”</b>	<b>Public Lands (% of total)</b>
Arizona	0	0%
California	535,068	0.35%
Colorado	96,096	0.06%
Idaho	30,374	0.02%
Montana	38,313	0.03%
New Mexico	14,623	0.01%
Nevada	6,165,927	4.05%
Oregon	81,499	0.05%
Utah	37,1905	0.24%
Wyoming	92,811	0.06%
<b>TOTAL</b>	<b>7,426,616</b>	<b>4.87%</b>
