 Subject: Antenna

Loti:

I will be unable to make the antenna plan on Tues but would like all to be aware of the safety implications of antenna installations to our employees and visitors. Any agreement or plan should require the group requesting the installation to perform a RF safety study before approval by the park service. The report I attach shows how we are pushing the edge of safety up on Mt. Washburn.

Please forward this to those people who need to know.

Sorry I can't make it.

Brandon
