Re: Library

Furniture(Document

link: Region 5 AFGE)

John

The proceeds that the government received from the sale for the library furniture was approximately \$350.00. This cost does include tear down and removing the furniture from the premises. Because this is furniture it's not apart of our inventory system and we do not keep records of furniture costs, but I believe the acquisition cost was about \$40K.

Please keep in mind the depreciation of the furniture in the last 15 years and the cost to tear it down and haul it away.
