I figured you would just call Joanne Heid to find out.. Should have the document to you Friday latest.

On another front, serious problem brewing on asphalt millings/recycling. I mentioned it to you previously (related to huge fine received by Tilcon written up by Rai and his group), and it is now bubbling up. Industry groups are getting involved. I'll fill you in shortly. Probably need to ask for a meeting... Sorry....thanks.

Nancy, as a heads up, Holcim's consultant (Environ) is finishing up a written summary/report that analyzes the first draft dust study. The company wants to send it to you and hopefully go to those conducting the peer review. It should also be helpful in advance of our June 2nd meeting. Thanks — Brian.

Subject: Fwd: Holcim/Dust Study Report - Letter from Environ Corp.

Jeanne:

Attached is a technical review of the Camden Dust Study (the "draft" which was posted on our website) done by Environ Corp for Holcim (St Lawrence Cement). Even tho we have modified the report, I think Environ's comments pertain to issues which were not changed and thus are relevant to the current version as well.

(— ACD - deliberative paragraph —)

Nancy

Hi Nancy. As I mentioned, attached is a letter to you from Holcim's environmental expert, Environ Corp. It offers an in-depth evaluation of the dust study report which was previously posted on NJDEP's website. Please pass this along to those conducting your peer review, along with others at the NJDEP and UMDNJ who will be involved in our meeting June 2nd. I believe it will significantly help advance our dialogue.

Please note, the first three pages of the report offers a concise executive summary of the issues and concerns with the dust study. The remaining 17 pages explains the issues in more detail, and of course more technically oriented for those involved in the peer review and science/research at the Department.

Thanks so much for your ongoing assistance with this matter. We look forward to meeting June 2nd.

Regards,
Brian

Subject: Holcim/Camden - Tuesday Meeting, 1pm

Nancy, look forward to seeing you tomorrow 1pm with the Holcim and NJDEP/UMDNJ crew. Should be tons of fun!

I told our group that the NJDEP/UMDNJ tech folks will give a 30 minute presentation after you open the meeting. We think that's a great idea, and our experts will be on hand to provide feedback and get into a healthy discussion. As I know we have a limited window to meet (I think you said 2 hours), I would suggest the 30 minute presentation not run much past that time allotted. Based on my calculation, we of course have a lot to discuss.

Please note, we will have 7 people attending the meeting, including senior management from Holcim. I mention that as you may want to use the big conference room if you haven't already planned for it.

Very much appreciated, as always... Brian.

Subject: Re: Fwd: OPRA#81603-St Lawrence Cement/Camden Dust Study

yesterday's meeting was a technical meeting where the people who performed the dust study (EOSHI (Env and Occupational Safety and Health Institute/Rutgers)) made a presentation on the study.

>>> Peggy Reading 6/3/2009 11:47 AM >>>

Nancy....per the attachment below, can you confirm for me that the only discussion at yesterday's meeting pertained to the Camden Dust Study. I'm trying to narrow down the scope of interest on this request to the "Study"....and eliminate the permitting portion.
