Subject: RE: Cancellation of NRCS Conservation Webinar, "Perspectives from the Prairies: Uncovering the facts about the impacts of neonicotinoid insecticides on wetland ecosystems"
Date: Wednesday, June 04, 2014 8:52:41 AM

Hi Bill:

Yes, it was my decision to cancel these two webinars. I am sorry to disappoint you, but I determined that these topics were not appropriate for an NRCS sponsored webinar. As I believe you were working with these potential presenters, please contact them to let them know the webinars are cancelled.

Moving forward, I recently established a committee to solicit potential topics from states, specialists, centers, discipline leaders and others; who will then provide recommendations to me for webinars. This will provide consideration and selection of topics at an earlier stage before they get placed on a schedule for presentation. You should receive a request from the committee for proposing potential webinar topics in the near future, so please be sure to use this process. Matthew Judy is the representative for the Central NTSC, so he will most likely be the person to whom you can provide proposed topics.

Yours,
Wayne

C. Wayne Honeycutt, Ph.D.
