## Document Body

John and Truett. We are in bed with the EPA again, it looks, at least according to this article. The advocacy groups are well organized and have the ready ear of the press. Dave

Hello:

The following article was sent to you from timesunion.com by Melissa Hendricks (melissa@aca-usa.org).

Here's the article from Brian. Let's discuss.

-----  
Fly ash: Culprit at Lafarge?

Residue of coal-burning is being examined as possible source of mercury pollution

by: BRIAN NEARING Staff writer

COEYMANS • It's possibly the biggest environmental mystery in the Hudson Valley: Why does the smokestack at the Lafarge cement plant release more toxic mercury than any other place in the state?
