

Tim's Notes

5/22/09 Conversation Jy/Tim

Jy Smuckert - talked to me down near the barn - He started by saying he came down to straighten everyone out on where they were spraying. He also - said he was not expecting his crew to spend two days with Mike Bongreen. He then said that Darren/Brent were violating the the label (He asked me if the label was the law / I said it was / and what do you mean? He said the wind speed was over 10mph when they were spraying. I then asked Jy if he knew how they were spraying boom or wand? "I don't know" - I said it makes a difference in how much wind. He said they applied all that chemical when wind made us look like we were not doing anything when we were out with Mike. He also gave many other excuses such that all these new employees don't understand or have used any of the equipment (maint) should be maintaining and fixing getting ready. I said that all folks

Cont.

with applicators license should know that  
60 psi is too high - ~~the~~ Ty said they  
don't know that or know how to adjust it.  
Ty gave a bunch more excuses.
