Truly Effective Outdoor Mosquito Control with Mosquito Misting

When you want to take in the pleasures of your own yard - patio or pool, fun with kids or parties with adults - you deserve to do so in complete comfort. You shouldn't have to be at the mercy of annoying insects, mosquitoes, no-see-ums and their painful bites. Fortunately, you won't be with MistAway - the revolutionary automatic mosquito misting system that effectively eliminates mosquitoes and other biting insects from your yard.

A MistAway mosquito control system automatically sprays a very fine mist of [botanical insecticide](#) through a series of mosquito misting nozzles installed on your property. Once installed, our system virtually disappears into your landscape. You won't even know it's there. Whatever your requirements, a Mist Away mosquito misting system can be customized to fit your yard perfectly.

There has never been a more effective outdoor mosquito control product than the MistAway Mosquito Misting System.

The automatic mosquito misting control unit - either our [innovative tankless mosquito misting model](#) or our [traditional drum-based mosquito misting model](#) - is located anywhere that is convenient to a water faucet and electrical outlet.

Our precision-engineered mosquito misting nozzles are installed about every 10-15 feet around the perimeter of your property; on fence lines, trees and risers positioned in the landscaping for a mosquito-free yard.

About MosquitoNix

MosquitoNix, a division of FEMO Group, is the nation's leader in mosquito misting systems, servicing tens of thousands of customers in more than 400 U.S. cities and nine countries. MosquitoNix offers custom installed misting systems and ongoing barrier treatments called QuickNix™, using effective solutions to eliminate flying, biting insects such as mosquitoes, no-see ums, flies, fleas, and ticks. MosquitoNix empowers customers to protect their families against mosquitoes and enjoy their outdoor lifestyles. An industry expert, MosquitoNix focuses on customer service and builds its own systems in America.

At MosquitoNix, our mosquito control solutions are safe for your family, your pets, and your garden. Our misting systems use pyrethrum, a natural mosquito killer made from chrysanthemums. Regardless of the size of your yard, your budget, or your individual mosquito control challenges, we'll engineer a custom mosquito system just for you. Our mosquito misting systems and QuickNix treatments are the most effective mosquito control solutions on the market, giving you back your backyard — and your peace of mind.

What We Do - Kill Mosquitoes

If you want to kill mosquitoes, MistGuard can help you. We will clear your yard of mosquitoes, ticks, no-see-ums, and gnats, reducing your risk of contracting the dreaded West Nile Virus and EEE. You'll never again have to spray your kids with messy repellents or remember to fog your yard before an evening cookout.

MistGuard will come to your home and design a professional system customized for your yard. We know just where to install our precision engineered nozzles — whether on the eaves of your home, along a fence line, or in your landscaping, to stop mosquitoes at the source while preserving the beauty of your yard. Once installed, the system disappears into the landscape so you won't even know it's there. Whatever your needs, a system can be customized to fit your yard perfectly. MistAway systems work automatically and are virtually maintenance free.

How It Works

The mist creates a protective barrier keeping your family and pets safe. The system is generally programmed to spray at dusk and dawn when mosquitoes are most active and when other more beneficial insects such as bees and butterflies, are not. The primary ingredients--derived from chrysanthemum flowers--are called pyrethrins. ([Read more about botanical insecticides.](#)) They are rapidly degraded by sunlight or rain, leaving your property free of residue. And, because of their plant-based origin, insects don't build up resistance to pyrethrins. There is no more effective or convenient system on the market.

At MistGuard we have been extensively trained on the installation and use of the MistAway system. Our installers are factory-trained and experts in all MistAway systems.

Welcome

MistGuard knows that your home is your personal sanctuary, your retreat from the world. You've worked hard to create an atmosphere that your family can take pleasure in. So when you want to take in the enchantment of your own yard — whether gardening or sunbathing, entertaining friends or family, having fun poolside with the kids or pets — you deserve to do so in complete comfort.

For all that you've put into your home and yard, you shouldn't have to be at the mercy of bothersome insects and their painful, possibly hazardous, bites. Fortunately, you won't have to worry with the MistAway system — the revolutionary automatic insect mist system that effectively eliminates mosquitoes and other annoying, biting insects from your yard.

There has never been a more effective, convenient way to prevent insect bites in your yard. In addition, the system works automatically and is virtually maintenance free. You'll never again have to spray your kids with nasty repellents or fog your yard before an evening cookout. The system sprays a very fine mist of botanical insecticide through nozzles installed around the perimeter of your yard. The mist settles on the grass and landscaping, killing any mosquito that comes in contact with it and repelling any trying to get in.

The MistAway system is timed to mist at dusk and dawn when mosquitoes are most active and beneficial insects, like bees and butterflies, are not. It also kills and repels other unwanted pests, such as spiders, flies and gnats.

MistGuard is a family-owned and operated company that distributes, sells, installs, and maintains mosquito and tick control systems in New England. We have been in business for almost ten years and are experts in the installation of the MistAway System.

Mosquito Control Barrier ProtectionAll-Natural ProtectionAutomatic Misting SystemsSpecial Event SpraysTick Control

Continuous mosquito control with an automatic misting system.

If you're in need of a more continuous mosquito control option, an automatic misting system may be perfect for your property.

Mosquito misting systems:

- ✓ Automatically release a 30-second spray 2-4 times daily.
- ✓ Kill or repels mosquitoes and ticks in all treated areas.
- ✓ Consist of inconspicuous nylon tubing that connects strategically placed, corrosion-resistant, nickel-plated, stainless-steel nozzles.
- ✓ Include a remote control allowing you to opt for additional or fewer sprays to suit your needs.
- ✓ Are automatically filled, serviced and winterized by Mosquito Squad so you never need to lift a finger.

Our trained team members will come out and install the system around your home. After installing your mosquito control system, Mosquito Squad will refill your product when needed, and service and winterize the system each year.

Mosquito Control Barrier ProtectionAll-Natural ProtectionAutomatic Misting SystemsSpecial Event SpraysTick Control

Tick control protects your family from the dangers of Lyme disease.

Lyme disease and other tick-borne illnesses have been on the rise in the United States. The key to protecting you and your family from ticks is professional tick control.

At Mosquito Squad, we utilize an effective blend of our barrier spray treatment and tick tubes to eliminate ticks before they can get to you. Our traditional mosquito control spray kills adult ticks on contact, while tick tubes are placed around your property to entice mice. Yes, we said mice.

Mosquito Squad controls ticks with tick tubes that rely on the natural nesting instincts of mice and deliver a tick controlling insecticide directly to its home. Tick tubes are made of biodegradable tubes with treated cotton inside. When placed in their environment, mice collect the cotton for bedding. Since most ticks get their first blood meals from mice, they are exposed to the treated cotton, effectively eliminating the ticks.

It's important to consult a professional, like Mosquito Squad, to determine the timing and quantity of tubes and placement.

** Tick control not offered in Michigan without a license.*

> Frequently Asked Questions

→ How "Safe" is pyrethrum, the natural insecticide?
Pyrethrum is extracted from the chrysanthemum flower. It is clear and free of allergens. Furthermore, Pyrethrum has a low toxicity level, it is water based and biodegradable. This insecticide protects the chrysanthemum flowers from plant-eating insects. Insects do not build up immunity to pyrethrum as they do other chemicals and synthetic compounds dangerous to humans.

→ Does pyrethrum leave a residue like other chemicals and synthetic compounds?
NO. Pyrethrum is completely biodegradable. After pyrethrum affects the mosquitoes and other insects, it decomposes harmlessly.

→ Will pyrethrum insecticides harm my pets?
Used according to the label instructions, the insecticide is considered non-toxic to mammals. Pyrethrum insecticides have been used in agricultural and equine applications for a quarter century with no known harmful effects.

→ Is pyrethrum effective against any other insects?
Yes. Almost all insects are killed or repelled effectively by pyrethrum including mosquitoes, flies, spiders, gnats, roosting wasps and all other insects.

→ How "automatic" is the system?
Totally automatic and maintenance free. This is one of the key advantages of the system. You will never have to worry, or plan ahead to be able to enjoy your yard!
