Subject: OPRA 123472

Mr. Wolfe:

I have inquired about the existence of any additional responsive records to the above referenced OPRA request that sought records relating to "Bull's Island Management Plan and Technical Team". The Natural & Historic Resources Program has identified no additional records. The Department has not worked with any external agencies in drafting the plan and has no comments from any external agencies.

The Management Plan has not been finalized and is still being developed. The plan as well as internal comments on the plan have been withheld, or partial redacted in some of the responsive records provided to you, as deliberative pursuant to N.J.S.A. 47:1A-1.1.

The additional records that you mentioned in our telephone call such as a US Army Desist Order, Hunterdon County Soil Plan, communications between Assistant Commissioner Boornazian and the Delaware & Raritan Canal Commission are not responsive to this request. As such, the Department has not searched for them. Please submit OPRA requests for any additional records of interest.

Sincerely,

Matthew J. Coefer, Chief Records Custodian
