

Scientific Integrity Policy Status

7/13

The following table summarizes whether each agency’s Scientific Integrity Policy addresses the following factors:

- **Scientific Misconduct** –
 - Procedure for Complaint/Reporting – Whether the agency has a defined procedure for complaining of or reporting scientific misconduct.
 - Whistleblowing – Whether the Scientific Integrity Policy includes protection for scientists against retaliation.
 - Those agencies which only reference existing law without explicitly prohibiting retaliation for disclosing scientific misconduct are flagged in yellow.
- **Public Communications of Science** – Whether the Scientific Integrity Policy addresses scientists’ ability to communicate regarding their official work with the general public or media as well as publish in external peer-reviewed journals.
- **Use of Federal Advisory Committees** – Whether the Scientific Integrity Policy addresses the use and composition of Federal Advisory Committees, ad hoc advisory bodies of experts from outside the federal government typically to study and recommend action on a policy question.
- **External Peer Review** – Whether the Scientific Integrity Policy addresses whether and to what extent agency policy decisions will be based on science subjected to external peer review.
